750,000 engines are produced each year at Ford, Dagenham using 350 Edmolift scissor lift platforms

We work extensively with the automotive industry, clients include Ford, GM, VW, Nissan, Audi, Honda, JLR, Toyota and Daimler Benz. The lifts shown here are part of a total consignment of 350 units for the Ford Dagenham engine plant. Options include turntables, forklift chasses and tow-tug docks. The factory floor is forklift free, all lifts are loaded by tow-tugs and AVGs.

Better On Every Level

Holmatro produce rescue equipment relied upon by the Emergency Services worldwide. It is essential they use only the very best machinery within their production to ensure this vital equipment is delivered without delay.

Ergonomic lift & tilt tables

For lifts intended for intensive use we incorporate our heavy-duty package. This includes grease points in all links, an air cooled hydraulic system, chromed axles and pins, steel runner gear, reinforced platforms and scissor arms. We can also provide continuously running motors, fast pumps and double acting hydraulic cylinders. The lift shown above features a gravity pallet roller conveyor. Powered rollers are also available.

We would be delighted to discuss scissor lift integration with you.

PRODUCTION & AUTOMATION SCISSOR PLATFORM LIFTS

THE TOUGHEST SCISSOR LIFT
PLATFORMS FOR THE TOUGHEST
JOBS. HEAVY DUTY LIFTS
DESIGNED FOR THE HARSHTEST
ENVIRONMENTS

Veka are the world's biggest manufacturer of extruded aluminium windows and doors with an annual turnover in excess of 1B euros. They use 30 Edmolift TS2001 scissor lift platforms within their UK production facility.

Fully automated chain conveyor loads these TS2001 model scissor lifts. The lifts can be synchronised so that larger loads of extruded aluminium can span two or three lifts. The lifts are used in the mass production of windows and doors by the biggest producer in the world. All lifts operate constantly over three shifts.

SERVICE AND SUPPORT

OUR THREE YEAR PRODUCT WARRANTY AND FIVE YEAR STRUCTURAL GUARANTEE IS UNDERPINNED BY OUR NATIONWIDE NETWORK OF HIGHLY QUALIFIED TECHNICIANS, UK SPARES STOCK-HOLDING AND ON-DEMAND SUPPORT. WE ARE ALWAYS AVAILABLE TO PROVIDE ANY ASSISTANCE YOU MAY REQUIRE.

Providing excellent aftersales service support is a key area for us and a major contributing factor towards our Chamber of Commerce Customer Care Award. Our nationwide network of highly qualified, highly experienced engineers is supported by the very best team of designers, industry experts and solution providers. Each engineer operates from a fully equipped mobile workshop utilising modern equipment, tools and testing apparatus. Most commonly used replacement parts are held in stock: fault diagnosis and repair can be carried out quickly without the need for extended shipping. An express service is also available. For complete confidence our service programme will provide absolute peace of mind. Regular services ensure full compliance with your PUWER and LOLER obligations. All visits are diarised and we contact you to make the arrangements so you can take care of business. Our aftersales support includes: full workshop facilities, load and pressure testing, refurbishment, training, stress analysis, installation and guidance.
